## 7.92.0 New Features

This guide lists new features available in eTapestry 7.92.0, released on April 13, 2025.

### DIY Forms: Support for QR codes

To help you share DIY forms, you can now generate and share QR codes so recipients can open a DIY form's URL from their device.

To download a shareable QR code, from Management, DIY Forms, select Download QR Code under a form's Sharing section.

**Note:** This option is only available for published forms.

### Mass Email Delivery Report: Click-through Stats Enhancement

Now, when you access View all Click-through Clicks under Click-through Stats from a mass email delivery report, you can view the Account Number column.

### Mass Update: Remove account User Defined Field text values

With this update, you can now use Mass Update to clear account User Defined Field text values from any associated accounts.

For more information, see [Mass Update for Removing Items](#).

### Look and feel improvements

We've made updates to the look and feel of eTapestry. Although these updates should not disrupt your current processes, you will likely notice slight changes in how information appears.

With this release, we've also made the following improvements:

- On pages where you search a list, results now update as you enter terms in the search field.
- Enhanced attachment upload experience.
- Improved progress indicator for the Campaign Performance, Approach Performance, and Fundraiser Performance tiles on the Home page.
